Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tamura et al.

3. Claims 1, 4, 7, 9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yoshioka. See box 47 in Figure 4,

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tamura et al. in view of Thakur et al. Tamura et al. the claimed invention except for the cover comprises acrylic. Thakur et al. teaches that it is known to provide a sterile airflow device with acrylic material as set forth at column 2, lines 46-51. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the device of Tamura et al. of acrylic, as taught by Thakur et al. in order to take advantage of the chemical resistance thereof.

Art Unit: 3749

6. Claims 2, 8, 9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshioka in view of Thakur et al. Yoshioka the claimed invention except for the cover comprises acrylic and a fan filter. Thakur et al. teaches that it is known to provide a sterile airflow device with acrylic material as set forth at column 2, lines 46-51 and a fan filter as set forth at column 2, lines 31-41. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the device of Yoshioka of acrylic and to provide the device with a conventional fan filter, as taught by Thakur et al. in order to take advantage of the chemical resistance thereof and to provide a conventional unitary filter and blower arrangement.

7. Claims 5, 6, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshioka in view of Knab. Yoshioka discloses the claimed invention except for the bottom having two layers. Knab teaches that it is known to provide a clean room with a bottom having two layers as set forth at column 3, lines 7-58. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the exhaust port of Yoshioka with two layers, as taught by Knab in order to avoid reverse flow of contaminate. As to claims 6, 10 and 13, it is considered to be well known to provide opening where needed.

Response to Arguments

8. Applicant's arguments with respect to claims 1, 7 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
